## Full Stack developer

Dedicated and self-motivated Full Stack Developer with extensive experience in PHP (Laravel, Yii2), Node.js (Sails, Express), and Angular. Proven track record of adopting new technologies to improve development efficiency and drive application innovation. Proficient in designing, developing, and optimizing scalable full-stack applications with a strong focus on performance and maintainability.

## Experience

Aug 2022 - Present

### Software Analyst

Chain-Sys India Pvt Ltd, Elcot IT Park, Madurai, India. Developing the product based on requirements using Angular for the front-end and Node.js for the back-end.

Sep 2020 - Mar 2022

### PHP Developer

Hitasoft Technology Solutions Pvt Ltd  
Created and developed high-performance e-commerce web applications, with over 6 successfully hosted on websites

Mar 2022 - Aug 2022

### Associate Software Engineer

Shenll Technology Solutions  
Creating and developing back-end applications for products using Node.js (APIs)

## Education

May 2019 **Bachelor of Engineering in Computer Science** in Government College of Engineering Bodinayakkanur, Theni, India

## Skills

Organizational Skills  
Project Management  
Collaboration Skills  
Communication Skills  
Analytical Skills

## Software

Docker  
Git  
Postman  
Figma  
VS code  
Eclipse

## projects done

Smart App Builder for  
No Code Platform

Enterprise app development is now easier than ever. I primarily work on backend development and app layout generation using **Node.js (Sails framework)**. Additionally, I have experience with **TypeScript (Angular 17), Couchdb, Rest api, web sockets, docker deployments**.

CB-Zero(chargeback Service)  
[cbzero.com](http://cbzero.com)

Chargeback management application. I developed a set of **APIs** for CB-Zero, a chargeback service, utilizing **Node.js and React.js**, designed and implemented based on REST architecture. I have experience with **MVC, swagger, postman, mongodb**

AllianPay  
[allianpay.com](http://allianpay.com)

Payment transaction app designed for restricted countries, facilitating transactions through QR codes. My primary responsibilities included creating APIs using **node js(express js)** and developing the front-end using **AngularJS** with **mongodb**

Howzu  
[howzu.appcodes.in/web](http://howzu.appcodes.in/web)

Online dating app like Tinder. My primary responsibilities included creating APIs using **PHP (Laravel framework)** for mobile apps, web and developing the web front-end using **AngularJS** with **MySQLdb** and Develop multiple **payment gateways**.

JoyBid  
<https://joybid.appcodes.in>

online auction business app, similar to a Tophatters clone. My primary responsibilities involved creating APIs using **PHP (YII2 framework)** for mobile apps and developing both the front-end and backend using **PHP (YII2 framework) with MySQL**.

JoySale  
[joysale.appcodes.in](http://joysale.appcodes.in)

The Letgo Clone Script is an online buy-and-sell app. My main responsibilities included developing APIs using PHP (YII2 framework) for mobile apps, web and building both the front-end and back-end with **PHP (YII2 framework) and MySQL**.

## My accomplishments tasks in the above projects

---

### *Smart App Builder for No Code Platform:*

Dynamic API generation task

The Smart App Builder for the No-Code platform allows **users to write APIs directly** in the front-end editor. These APIs are seamlessly added to the backend **Node.js app without the need to restart** the Node js server. (Typically, generating an API would require restarting the Node.js server)

### *JoyBid:*

Handling multiple  
WebSocket connections

The Joybid Tophatters clone script requires multiple listeners to update live auction data between users. This project supports over 7 live listeners for efficient data synchronization

### *JoysSale:*

Chat app like whatsapp

JoySale allows sellers and buyers to chat directly, so I developed an entire chat application similar to WhatsApp.

## projects done on interest

---

KMR Foundations  
[worldwellwishers.org](http://worldwellwishers.org)

Website for truest. i create a reliable and visually appealing website for KMR Foundations

Recruitment Web App

Candidate information gathering and selection app for TN **Anganwadi workers**, part of the Tamil Nadu **government's project**. My primary responsibility was backend development using PHP.

Information management web app.

Abandoned children's information management web app for **Claretian Mercy Home**. I developed the entire web app using PHP (Laravel framework).
