SUMMARY

Full Stack Developer (2020 graduate) with 5.5 years of experience building scalable server-side applications and **RESTFUL** APIs using [Node.js \(Oracle\)](#). Skilled in backend optimization, modular architecture, and secure authentication. Strong expertise in Node.js and **AWS**, with solid **DSA** and tree knowledge. Proficient in frontend technologies including **React**, and **PHP**. Known for fast learning, strong problem-solving, and delivering stable, production-ready code.

EXPERIENCE

Frontend Team Lead

Warely Technologies

Jul 2025 - Present

- Architected and delivered a full **POS (Point of Sale)** application from scratch for Singapore-based users using **React.js** (frontend), **Node.js** and **PHP** (backend).
- Contributed to end-to-end system architecture, UI workflows, REST API development, third-party integrations, and performance optimization to ensure a seamless retail experience.
- Developed scalable backend services with **Node.js**, including authentication, business logic handling, and API integrations.
- Built responsive and interactive frontend modules using React.js for billing, inventory, reporting, and user management workflows.
- Leveraged AWS EC2 for application hosting, AWS S3 for secure asset storage, and AWS Lambda for serverless background processing and integrations.
- Engineered and scaled a complete e-commerce platform covering product management, cart and checkout flows, user authentication, payment integration, and order tracking.
- Designed scalable backend APIs using Node.js and PHP while implementing optimized database operations and secure authentication mechanisms.
- Created responsive frontend experiences with React.js, focusing on usability, performance optimization, and seamless customer interactions.
- Deployed and managed cloud infrastructure on AWS EC2, utilized AWS S3 for media and document storage, and implemented AWS Lambda for event-driven automation and asynchronous tasks.

Software Analyst

Chain-Sys India Pvt Ltd, Elcot IT Park, Madurai

Aug 2022 – Jul 2025

- Implemented 10+ enterprise-grade features using **React js** and **Node.js**, improving system usability and client adoption.
- Built a **dynamic drag-and-drop project builder** used by 200+ users, reducing configuration time by 40%.
- Designed and built REST APIs with optimized queries, improving response time by 30% and reducing server load.
- Created 15+ reusable UI components, accelerating development speed across teams.
- Collaborated in Agile sprints to deliver 25+ releases with minimal production defects.

- Deployed applications to **AWS (EC2, Lambda, S3)** as per client requirements.

Associate Software Engineer

Shell Technology Solutions

Mar 2022 – Aug 2022

- Designed secure, high-performance backend systems using **Node.js** with scalable architecture and service-layer patterns.
- Implemented JWT-based authentication, Redis caching, optimized SQL queries, error-handling middleware, and automated cron jobs.
- Developed responsive and dynamic frontend applications using **React.js** with reusable components and API integration.
- Built seamless user experiences with state management, form handling, routing, and frontend performance optimization in **React.js**.
- Deployed and managed services on AWS EC2, utilized AWS S3 for secure file and asset storage, and integrated AWS Lambda for serverless background jobs and event-driven processing.
- Improved API reliability and cross-team collaboration through detailed Swagger/Postman documentation and seamless coordination with frontend and QA teams.
- Performed continuous performance monitoring, debugging, and cloud-based logging within AWS environments to ensure application stability and scalability.

PHP Developer

Hitasoft Technology Solutions Pvt Ltd

Sep 2020 – Mar 2022

- Built and deployed high-performance PHP-based e-commerce applications along with modern Node.js and React.js solutions.
- Successfully delivered and deployed 5+ production websites and full-stack web applications.
- Developed scalable REST APIs using **Node.js** and integrated dynamic frontend interfaces with **React.js**.
- Implemented payment gateways, order workflows, inventory management modules, and cache optimization.
- Created responsive, user-friendly UI components and optimized frontend performance using React.js best practices.
- Worked with backend services, database integration, authentication systems, and third-party API integrations using **Node.js**.

Elysium Academy & Java course

Jul 2020 – Sep 2020

- Completed a comprehensive Java training program.
- Created student projects using PHP and Angular.

TECHNICAL SKILLS

Back-end: Node.js (Express, Sails), PHP (Laravel, Yii2), Python, system design

Front-end: Angular, JavaScript, TypeScript, HTML5, CSS3, React js, system design

Mobile: Flutter

Databases: MySQL, MongoDB, CouchDB, DynamoDB, Oracle

Tools: Docker, Git, Postman, Figma, VS Code, Eclipse

Other: API Development, Scalable Architecture, Microservices, Debugging, System design, azure, docker

AWS: Lambda, S3, Ec2, IAM, RDS, EBS, VPC, CloudFront, Athena, SNA, SQS, Event Bridge etc..

AI agents: Cursor, Windsurf, GitHub Copilot, Tabnine, Chat gpt plus

SOFT SKILLS

- Analytical Thinking
 - Collaboration & Teamwork
 - Communication Skills
 - Organizational Skills
 - Project Management
-

STRENGTHS

- Quickly adaptable to new technologies
 - Strong problem-solving mindset
 - Clean coding & efficient debugging
 - Ability to deliver under deadlines
-

EDUCATION

Bachelor of Engineering (Computer Science Engineering)

Government College of Engineering, Bodinayakkanur, Theni, India

May 2020
